

LANCE MEADOWS

1193 Mallard Creek Rd, Louisville, KY 40207 ● 775.287.0903 ● lance@meadoware.net

CAREER OBJECTIVE:

To obtain a web designer position in a company that challenges the boundaries of creativity, exceeds the standards of the industry, and refuses to settle for status quo.

KEY SKILLS:

Programming Skills: HTML, XHTML, CSS, PHP, Javascript, AJAX, jQuery, SQL/MySQL, ColdFusion, Flash, VB.net, SEO, graphic design, and photo editing

DBMS Used: MS Access, SQL/MySQL, MAS500

EXPERIENCE:

Independent Web Developer

2007-Present

- Custom websites developed and maintained for companies and private clients using HTML/XHTML, CSS, PHP, Javascript, AJAX, jQuery, SQL/MySQL, ColdFusion, Flash, and VB.net
- Dreamweaver, Photoshop, and Flash used as development tools
- Layout designs conceptualized and implemented
- Graphic development and optimization
- Servers and databases maintained
- Designed according to industry standards (including making sure websites were W3Schools compliant)

WeGotHookups.com: Responsible for the design and development of this E-commerce site which included shopping cart functionality and PayPal integration, multi-client usability, integration of QR codes, extensive database design, and subscriber functionality including private accounts and mailing lists.

AsianNexus.net: Designed and implemented the company creative. Used jQuery to program a web site featuring movement and clean, simple design. Site was designed and built ahead of schedule.

AlmFamilyMedicine.com: In addition to designing and building the site, I designed the logo and placed specific emphasis on SEO in order to maximize the client's visibility on the Web.

DesertBogies.com: Integrated a custom content management system to allow the client to update the site as needed. Designed and implemented all graphic work.

Independent MS Access Consultant Clear Choice, LLC (Reno, Nevada)

October 2008-
Present

- Maintained, created, and updated reports
- Increased connectivity to Microsoft SQL to make the database faster and more shareable
- Commented code written by previous programmers to optimize future code maintenance

Access Programmer/Analyst Precision Quality Software (Reno, Nevada and Fallon, Nevada)

2003- Present

- Performed requirements engineering, design, programming and testing on complex (200+ data tables, vast amounts of code) custom database software for various clients including Albertson's (groceries) and Philips (electronics) using Microsoft Access and Microsoft SQL Server
- Performed requirements engineering, design, programming and testing on integrating custom database software with Sage MAS500 Enterprise accounting software, using Microsoft Access and Microsoft SQL Server
- Improved in-house software to increase office productivity and client results
- Performed Microsoft SQL Server database administrator functions for clients and in-house servers
